

Patriotic Purposed Committee

July 14. 2023

Location: War Memorial Lot

Attendance: Jay Wilson, Zoe and Mike Fimbel, Meg Baker, Bruce Tower

Begin 9:00 am

Rough measurements were taken and marked with white spray paint in preparation for the installation of a granite post and rail fence to be installed on the south, west and north sides of the lot. General dimensions of the granite post 7" by 7" and the standard height allowing a portion to be in the ground for stability. The rails would generally be 8 feet. This could vary due to the installation position of the granite post due to the unknown sub surface terrain.

South lot line:

The current stone wall is one foot from the property line between the homeowner and the lot; suggestions were made to remove the overgrowth and protect the area with heavy duty garden fabric, mulch or gravel. This would be a future action.

Total granite posts: 2 and Total 6-foot rails: 4

West lot line:

Position: right of the walkway

The left granite post would be positioned adjacent to the entry walkway paver, the right side of the walkway garden would be lengthened to meet the front paver edge.

Total granite posts: 7 and Total 8-foot rails: 14

Position: left of the walkway

The right granite post would be positioned adjacent to the entry walkway paver, the left side of the walkway garden would be lengthened to meet the front paver edge.

Total granite posts: 5 and Total 8-foot: 10

The positions of this area would be adjusted to avoid the two utility poles, to accommodate a 6-foot swing entry gate to allow yard maintenance equipment to serve the property

A discussion took place addressing a small triangular parcel of the lot located outside the fencing. The potential action would be to mount a tablet [similar to a headstone size] on which donor names would be engraved including the scout who designed the walkway. Low growing vegetation would be selected to complete the landscaping.

North lot line:

Total granite posts: 8 and Total 8-foot rails: 16

Summary:

Total granite posts: $2+7+5+8=22$

Total 8-foot rails: $4+14+10+16=44$

Jay requested the data to be sent to both he and Zoe. Meg will complete the action.

Meg requested permission to move forward with Nov 11 preparations. Zoe and Jay were in agreement.

Meg will contact Jay for the budget for Nov 11.

Concluded: 10 am

Respectfully submitted, Meg Baker
